PROFESSIONAL SUMMARY

Dan currently serves as Senior Project Manager in Bohler Engineering, serving the Sterling, Virginia and Bowie, Maryland offices. Dan is primarily responsible for client and project management for various institutional, commercial, residential and industrial developments.

EXPERIENCE

Throughout his career, Dan has supervised a multitude of projects in over 50 municipalities in Maryland, Virginia, Delaware, Pennsylvania, New Jersey and the District of Columbia. He also has specific knowledge of site feasibility analyses, site layout and planning, zoning and subdivision/land development ordinance review interpretation and landscaping design and all areas pertinent to Civil Engineering. Dan has also offered expert testimony in several municipalities before Planning Commissions, Zoning Hearing Boards and related municipal entities in the District of Columbia, Maryland, Virginia, Delaware and Pennsylvania.

Dan has cultivated and maintained several key client relationships for both the Mid-Atlantic region and our corporate offices. Through these relationships, Dan has been involved with many key organizations which influence and partake in the future direction of regulatory advancements. These organizations include:

- DCBIA Committee on the Environment
- MNCBIA Liaison Committee
- ULI
- NAIOP Sustainable Design
- Metropolitan Washington Council of Governments
- NVBIA/NAIOP Urban Chapter - The NVBIA/NAIOP Urban Chapters focus on issues of significant importance to Arlington County projects.

At Bohler we have built our reputation on our ability to provide excellence in everything that we do. Our Core Values act as a guide for our staff in their day-to-day commitment to providing cutting edge design ideas and innovative design solutions. Our commitment to quality design, customer service, and teamwork provides our Clients with the opportunity to partner with a winning team that has a proven track record of success.
